Instructions

Greetings for using our app service here are some instructions please read them carefully,

Test user credentials:

username: testuser

password: 1234567890

1. You can register and sign in with signup details filled, or sign in with google.

2. Please allow all the device permission once logged in **do not deny.**

3. products can be added by scanning QR codes(only 7-digit number) or typing id manually**, each QR/ID can be used once for adding any product.**

4. View your product in inventory and can search on basis of name, qty, rate.

5. First-time user need to add products in order to see them in inventory.

6. Festival products are filter of **product name(cake, rabdi, sevaiyaan, gulab jamun, sabudana)** so in order to see festival items you need to **add productname** with any of the above-mentioned names(**in lowercase**).

7. You can sell products on basis of scanning same ID's used at time of adding any product, selling is done on basis of qty given and amt will generate automatically.

8. Product adding is done through payment gateway, you can ignore also**(payment is for testing purpose only we do not intent to fetch your money for our app service its just a upi id payment to another UPI on certain amount calculated)**.

9. You will receive low stock warning if your product qty is less than 10.

10. You can call supplier's in supplier's dashboard for selling your product or getting product/info from another dealer.

That's it.
